## Glazing Options

### STAINED UNITS

All stained units are individually hand made. If you do not see the design you would like in this brochure we would be happy to discuss your requirements.

### SANDBLAST / ETCHED GLASS

This handcrafted glass is designed to give a traditional appearance. Though generally obscure it does leave various areas clear.

### BEVELLED GLASS

4mm shaped and polished glass facets, hand crafted and bonded to the glass with an optically clear resin then overlaid with lead.

### RESIN BEVEL

Resin bevels should not be confused with traditional bevels. Each resin is obscure and the design will occasionally produce minor imperfections that are generally regarded as acceptable.

### Important Notice

PVCu Infill Door Panels as illustrated in this brochure may not appear exactly the same in every case when fitted. The brochure has been compiled using an average opening width for demonstration only.

The area of panel, which is visible around the raised and fielded sections, is determined by the actual brickwork opening on your particular property.

Wider openings will produce more of a border than a narrow aperture - likewise a narrow opening will have less visible border.
